EPABX, FIRE ALARM AND P.A. SYSTEM

A PBX (Private Branch Exchange) system (PABX/EPABX) is a basic requirement for any type of business whether large or small they are. Without a proper communication backbone being setup in an organization, day to day activities will be affected that can result to inaccurate information exchange up to huge potential loss of business or revenue.

Our expertise allows us to offer high quality Fire Alarm System to our clients. These products are appreciated for its quality and immediate solutions. Our range includes Conventional Fire Alarm Panel, Conventional Smoke Detector, Conventional Heat Detector, Manual Call Point, Response Indicator and HOOTER.

A public address system (PA system) are often used in small venues such as school auditoriums, churches, and small bars. PA systems with a larger number of speakers are widely used in institutional and commercial buildings, to read announcements or declare states of emergency. Intercom systems, which are often used in schools, also have microphones in each room so that the occupants can reply to the central office

As a service oriented company we shall understand the customer requirement and provide them the best Products and Services.
